Citizen-friendly language – how clear writing can help adapt bureaucratic language to public needs

Bureaucratic language by public authorities has always been an issue. Complicated and incomprehensible texts drafted in an impersonal and passive style can deter the public and lead to a delay in handling citizens' requests, which can increase costs. Clear writing can be the solution to this. It helps draft more comprehensible and approachable texts that leave less room for doubt, thereby saving time and money. We have invited four expert writers from Germany and Austria to share their experience with clear writing for public authorities and answer questions from our participants.

Sustainability Week Asia

Through a series of debates, discussions, interviews and case studies, we will bring together an expert speaker faculty to discuss how organizations can optimize their ESG performance. How can capital flows be influenced towards activities that will support the transition to a low-carbon, climate-resilient and sustainable economy? What financial instruments will help organizations achieve their strategic (sustainable) growth objectives? And, how can and are organizations measuring, managing and mitigating climate change risks?
