Are you passionate about digital health? Join the Global Digital Health Forum December 4-6, 2023 – the largest gathering of digital health practitioners including tech innovators, funders, policymakers, project implementers, researchers, and students.

GDHF is the leading global public health industry networking and relationship-building opportunity for technology vendors, donors, researchers, government representatives, and implementing organizations working in low- and middle-income countries.

The annual Global Digital Health Forum is set to convene in a hybrid format for the first time. Digital health can give anyone access to information and services. But sometimes, it can unfairly exclude. How do we bridge the gaps in digital health and ensure that no one is left behind? How do we make life easier for overburdened health care workers and caregivers? How do we address the realities of pandemics and climate change that are changing our lives daily? This year's Forum will explore all of these issues and more.

HERE'S A SNEAK PEEK AT WHAT AWAITS YOU AT THE EVENT:

- Engaging with government stakeholders
- Connecting with digital health developers
- Exploring the latest research
- Collaborating with donors
- Partnering with implementers
- Learning from field experts in public health and technology from across the globe

The event will take place both virtually and in person, so you will have a chance to engage no matter where you are!

With your active participation, we'll spearhead effective and equitable digital health innovation together!
