The nature of the contract in question is such that national or regional economic operators do not have equal access to the requirements related to the use of the Belgian federal 'e-Procurement' platform. The technical characteristics may therefore be discriminatory and may restrict economic operators' access to the procurement procedure, particularly in terms of internet connection speed and quality, as well as the quality of the electricity transmission network. Furthermore, the specific forms provided for by this platform in terms of electronic signatures are not yet compatible with the ICT generally used.
